

Priestsic Primary and Nursery School

Phase 3 Parent Information

Children entering Phase Three will know some letters and children will be able to blend to read and segment to spell VC and CVC words containing them. All children should be able to orally blend and segment CVC words.

Phase Three teaches children one representation of vowel digraphs and vowel trigraphs. Children will be taught to recognise, identify and write the phonemes. Children will continue to practise CVC blending and segmenting using the phonemes taught. They will learn to read and spell some tricky keywords. By the end of Phase Three, children should be secure at reading CVC words and spelling them containing all of the taught phonemes. They will be able to read and write sentences containing the taught phonemes and tricky keywords. They will also be able to read and spell some simple two-syllable words and longer words.

Please see the Little Wandle website for further information regarding this and videos on how to pronounce the sounds.
